DETAILED ACTION

Allowable Subject Matter

1. Claims 21-40 are allowed.
2. The following is an examiner's statement of reasons for allowance: The closest available prior art—the Tonkovich (US 2003/0072699 A1) reference—discloses many of the features of the claimed invention, including reforming passages, reforming catalyst, combustion passages, and a gas manifold. However, Tonkovich does not disclose that the manifold is in direct fluid communication with the reforming passages and is capable of collecting reformat e nor does Tonkovich disclose the use of supply holes arranged in a line in the direction of combustion gas flow communicating the combustion passages with the reforming passages. While the concept of supply holes between adjacent passages is known—see newly cited Hamada (US 5,609,834)—there is no known motivation to modify Tonkovich to include this feature in the manner claimed: the combustion passages are not in fluid communication with the reforming passages and the reforming passages are not parallel to the outlet passages connected to the manifold. These features, in combination with each other and the remaining elements of the claims, are novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
